

Product Requirements Document (PRD)

Phantom & Co. – Professional Haunting Simulator

1. Project Overview

Phantom & Co. is a browser-based reverse horror game where the player assumes the role of a ghost employed by a paranormal agency. Instead of escaping ghosts, the player uses supernatural abilities to frighten AI-controlled human characters until they flee each haunted location.

The game shall be fully playable in a desktop web browser and shall include three sequential missions with increasing challenge.

2. Project Objective

Develop a browser-based game that enables players to:

- Control a ghost.
 - Complete three haunting missions.
 - Increase the Fear Meter by using ghost abilities.
 - Cause AI-controlled humans to escape.
 - Progress through three sequential levels.
 - Earn points through successful mission completion.
-

3. Target Platform

The game shall:

- Run entirely inside desktop web browsers.
 - Require no software installation.
 - Support the latest stable versions of:
 - Google Chrome
 - Microsoft Edge
 - Mozilla Firefox.
-

4. Asset Usage

The following assets shall be used as implementation references.

game_reference.png

Use as the primary gameplay and interface reference.

The reference defines:

- overall layout
- gameplay viewport
- HUD organization
- mission panel
- fear meter placement
- score placement
- ghost powers panel

The interface does not need to be recreated pixel-for-pixel.

ghost_character_reference.png

Use as the visual reference for the player-controlled ghost.

Preserve:

- translucent appearance
 - floating silhouette
 - cyan glow
 - overall proportions
-

environment_references.png

Use the document as the visual reference for the three playable environments.

The environments are:

- Abandoned House
- Haunted Manor
- Old Museum

Maintain the overall atmosphere while creating original game assets.

missions.json

Use the supplied mission definitions for:

- mission names
 - mission objectives
 - fear targets
 - human counts
 - time limits
 - victory conditions
 - failure conditions
-

5. Functional Requirements

FR-1 Player Character

The player shall control a ghost throughout the game.

The ghost shall remain the playable character during every mission.

FR-2 Haunted Environments

The game shall contain the following environments:

- Abandoned House
- Haunted Manor
- Old Museum

Each environment shall contain one playable mission.

FR-3 Ghost Abilities

The player shall be able to activate:

- Flicker Lights
- Move Objects
- Open Doors
- Whisper
- Paranormal Event

Each ability shall be independently usable during gameplay.

FR-4 Human Characters

Each mission shall include AI-controlled human characters.

Human characters shall respond to ghost abilities by increasing their fear level.

FR-5 Fear Meter

The game shall display a Fear Meter during gameplay.

The Fear Meter shall increase when ghost abilities successfully affect human characters.

Each mission shall require reaching its target Fear Meter value before completion.

FR-6 Mission System

The game shall contain three missions.

Each mission shall include:

- one mission objective
- one victory condition
- one failure condition

Completing a mission shall unlock the next mission.

FR-7 Scoring

Display the current score during gameplay.

Increase the score after successful mission objectives.

Display the final score on the Victory Screen.

FR-8 Progression

The game shall contain three sequential levels.

Level 2 shall provide greater challenge than Level 1.

Level 3 shall provide greater challenge than Level 2.

The increased challenge shall be achieved by:

- additional AI-controlled human characters, or
 - higher Fear Meter targets.
-

FR-9 User Interface

The game shall include:

- Main Menu
- Gameplay Screen
- Victory Screen
- Failure Screen

The Gameplay Screen shall display:

- Fear Meter
 - Current Score
 - Current Mission
-

FR-10 Audio

Include sound effects for:

- Flickering Lights
 - Whisper
 - Door Interaction
 - Paranormal Event
 - Mission Completion
-

FR-11 Animation

Include animations for:

- Ghost Movement
 - Light Flickering
 - Object Movement
 - Door Opening
 - Paranormal Event
-

FR-12 Responsive Layout

Gameplay shall remain usable after resizing the browser window.

6. Mission Definitions

Mission 1

Environment:

Abandoned House

Mission:

Get Them Out!

Humans:

3

Fear Target:

100

Time Limit:

300 seconds

Objective:

Increase the fear level until all humans escape.

Mission 2

Environment:

Haunted Manor

Mission:

Midnight Visitors

Humans:

4

Fear Target:

150

Time Limit:

360 seconds

Objective:

Increase the fear level until all humans escape.

Mission 3

Environment:

Old Museum

Mission:

Night at the Museum

Humans:

5

Fear Target:

200

Time Limit:

420 seconds

Objective:

Increase the fear level until all humans escape.

7. Deliverables

The completed project shall include:

1. Complete website source code.
2. All game assets required to run the game.
3. One playable browser game.
4. One revision round for minor gameplay or interface adjustments.

8. Scope Boundaries

The project does not include:

- Multiplayer gameplay
 - User accounts
 - Online leaderboards
 - Cloud saves
 - Backend services
 - Mobile applications
 - Downloadable content
 - In-game purchases
-

9. Acceptance Criteria

The project shall be considered complete when:

- The game runs in a supported desktop browser.
- The player controls the ghost throughout gameplay.
- Three playable environments are implemented.
- Three playable missions are implemented.
- All five ghost abilities are functional.
- AI-controlled human characters respond to ghost abilities.
- The Fear Meter is displayed and updates during gameplay.
- The score is displayed and updates during gameplay.
- Completing one mission unlocks the next mission.
- The Gameplay Screen displays the Fear Meter, Current Score, and Current Mission.
- The Main Menu, Gameplay Screen, Victory Screen, and Failure Screen are implemented.
- Required sound effects are included.
- Required gameplay animations are included.
- Gameplay remains usable after browser window resizing.
- Complete website source code is delivered.
- All required game assets are delivered.
- One playable browser game is delivered.
- One revision round is included.
